Help for Shore Birds

Along with monitoring by the various wader study groups there are a number of individuals who are involved in the treatment and rehabilitation of shore birds. One such local group is the "**Pelican and Seabird Rescue Group**" based at

Gumdale.

Volunteer group members have undertaken a training course at the Australian Sea Bird Rescue Unit at Ballina NSW. Some support is provided by the Port of Brisbane Corporation but the group mainly relies on donations, fund raising activities and grants to get this important work done.

In the last 6 months 397 birds have been rescued.
