Now here's a little story. Kaye (the Pres) and Barb (the Treas) were both at work one Saturday morning a while back when a man enquired at our shops if we knew of anyone in the area who could save wildlife. He had come across the weir at Pimpama and seen a bird in great distress tangled in fishing line. A few quick phone calls from Barb and she found the right people to help.

The next morning we were pleased to meet Sally and Hammy from Pelican and Seabird Rescue Inc. who came back to Jacobs Well to report the bird, a whistling KYTE, had been successfully rescued. These ladies are well trained and volunteer their time to rescue any type of seabirds in distress. They would like all members to put their contact number in your mobile phone and if at any time you witness an injured or disabled bird, whether on sea or land, please do not hesitate to call them. Contact numbers are listed below:
